

SANATH ACHARI

AWS Cloud & DevOps Engineer

Bengaluru, India | +91-9449447724 | sanatacharya23@gmail.com | linkedin.com/in/sanath-achari-856a69234

PROFESSIONAL SUMMARY

AWS Cloud and DevOps Engineer with hands-on internship experience deploying and managing cloud infrastructure on AWS. Skilled in building CI/CD pipelines, automating deployments, and using configuration management and source control tools to improve application performance and delivery efficiency.

TECHNICAL SKILLS

CI/CD: Jenkins

Build Tools: Maven

Containerization: Docker, Kubernetes, Helm

Source Control: Git, GitHub

Infrastructure as Code: Terraform

Artifact & Quality Management: Nexus3, SonarQube

Monitoring & Observability: Prometheus, Grafana, Loki

Cloud Platform: AWS

Operating Systems: Linux, Windows

PROFESSIONAL EXPERIENCE

DevOps Intern | Elevate Labs

Jul 2026 - Sep 2026

- Built an end-to-end CI/CD pipeline using Jenkins for build, test, security scanning, and deployment of a Java-based e-commerce application; integrated GitHub for automated pipeline triggering.
- Used Maven for build automation and dependency management; integrated Nexus for artifact storage, SonarQube for static code analysis, and Trivy for container vulnerability scanning.
- Containerized the application with Docker and deployed it to Amazon EKS using Kubernetes manifests, exposing services through a LoadBalancer.
- Implemented application and infrastructure monitoring with Prometheus and Grafana, and configured Jenkins email notifications for build and deployment status.

Junior Network Support Engineer | MAHE, Bengaluru

Jun 2025 - May 2026

- Monitored and maintained LAN/WAN infrastructure, configuring routers, switches, VLANs, DNS, DHCP, and subnetting.
- Performed Linux system administration including user management, file permissions, and service monitoring; diagnosed connectivity issues using Ping, Traceroute, and IPConfig/Iffconfig.

PROJECTS

Multi-Tier VPC Architecture with Peering (AWS)

- Designed two isolated VPCs with public/private subnets, configured VPC peering with CIDR block planning, and deployed EC2 instances to validate cross-VPC connectivity.

Docker-Based Deployment of a Python Web Application

- Containerized a Python Flask application with Docker and managed the full deployment lifecycle, from GitHub clone to running container with external port access.

End-to-End Deployment of a Java-Based E-Commerce Application

- Built a CI/CD pipeline with Jenkins, Maven, Nexus, SonarQube, and Trivy for automated build, testing, code-quality analysis, and vulnerability scanning.
- Containerized the application with Docker and deployed it to Amazon EKS using Kubernetes manifests, with monitoring via Prometheus and Grafana.

EDUCATION

BE in Electronics and Communication Engineering

Visvesvaraya Technological University, SDM Institute of Technology, Ujire | 2020 - 2024 | CGPA: 7.1

CERTIFICATIONS

- AWS Cloud Practitioner Essentials (CLF-C02) - AWS, Aug 2026
- Introduction to Kubernetes (LFS158) & Introduction to Linux (LFS101) - Linux Foundation, Sept 2026
- CISCO Certified Network Security - Udemy, Jan 2026
